

## Stephane Charbon

Stephane covered the vacant/not yet fully onboarded position of MSL D-CH and took over the medical part at the training we held for Aidshilfe Schweiz Employees on Monday 21. February. Despite having a very busy time in his job he traveled to Zurich and helped to deliver a very interesting and interactive training for the AHS employees. With his massive experience and knowledge and his truly lived patient focus Stephane answered all questions and led a lively discussion round and helped to raise the treatment literacy of the audience. Merci beaucoup for your support Stephane!
