

Certificate of Achievement

Stephane Charbon

has completed the following course:

CHRONIC RESPIRATORY DISEASES (CRD) IN PRIMARY CARE SETTINGS
THE UNIVERSITY OF EDINBURGH, INTERNATIONAL PRIMARY CARE RESPIRATORY GROUP (IPCRG)
AND RESPIRE

Chronic respiratory diseases (CRD) such as asthma & COPD are common in low resource settings. They are most often treated in primary care or in the community. Using case studies, video, readings & discussion, participants explored diagnosis, management and treatment of the most common forms of CRD.

5 weeks, 3 hours per week

Hilary Pinnock

Professor of Primary Care Respiratory Medicine
The University of Edinburgh

THE UNIVERSITY
of EDINBURGH

The person named on this certificate has completed the activities in the attached transcript. For more information about Certificates of Achievement and the effort required to become eligible, visit futurelearn.com/proof-of-learning/certificate-of-achievement.

This certificate represents proof of learning. It is not a formal qualification, degree, or part of a degree.

Stephane Charbon

has completed the following course:

CHRONIC RESPIRATORY DISEASES (CRD) IN PRIMARY CARE SETTINGS
THE UNIVERSITY OF EDINBURGH, INTERNATIONAL PRIMARY CARE
RESPIRATORY GROUP (IPCRG) AND RESPIRE

70%
OVERALL
SCORE

Chronic respiratory diseases (CRD) such as asthma & COPD are common in low resource settings. They are most often treated in primary care or in the community. Participants explored the main symptoms and risk factors; the physical, psychological and social impact on the individual, families and communities; skills in diagnosis and management; communication & supporting patients to live with their condition. Participants shared experiences & were supported to adapt advice to their local context.

STUDY REQUIREMENT

5 weeks, 3 hours per week

LEARNING OUTCOMES

- Understand the physical, psychological and social impact of chronic respiratory diseases on the individual, their family and community
- Demonstrate improved skills in the diagnosis and management of asthma, COPD and other chronic respiratory disease in children and adults
- Demonstrate improved skills in communicating and supporting patients with asthma, COPD and other CRDs to live with their condition (often in the context of multi-morbidity)
- Assess how to adapt advice to the local context, taking account of the global variation in access to care and treatment, and workforce
- Assess how to individualise the management of care in terms of affordability and availability of resources

SYLLABUS

- Module 1: The global burden of chronic respiratory disease

- Module 2: Diagnosis and management of asthma in resource-poor settings
- Module 3: Diagnosis and management of chronic obstructive pulmonary disease (COPD) in resource-poor settings
- Module 4: Diagnosis and management of other chronic respiratory disease common in resource-poor settings
- Module 5: Top tips for implementing care for people with chronic respiratory disease in resource-poor settings
